About

Computer Science and Information Technology graduate with hands-on experience in Java Backend Development using Spring Boot, Hibernate, REST APIs, MySQL, and Microservices. Skilled in designing scalable web applications, developing secure APIs, and implementing database-driven solutions. Strong foundation in Data Structures, OOPs, DBMS, and System Design with a passion for solving real-world problems through software engineering.

Experience

Tech-Coupling **Sep 2025 – Nov 2025**
Backend Java Developer Intern *India*

- Engineered a Spring Boot backend supporting 15+ features for a temple services e-commerce platform.
- Built 10+ RESTful APIs for catalog, orders, and booking workflows, improving request efficiency by 30%.
- Structured a MySQL schema with 12+ tables, reducing redundant data by 25%.
- Optimized database queries and API response handling, reducing average response times by 40% .

Technical Skills

Languages: Java, Python, C, C++, SQL
Frameworks & Libraries: Spring, Spring Boot, Hibernate, Spring Security, React.js, NumPy, Pandas
Web Technologies: REST APIs, Microservices, HTML5, CSS3, JavaScript
Databases & Tools: MySQL, Git, GitHub, Maven, Postman, VS Code
Core Concepts: DSA, OOP, DBMS, OS, Computer Networks, MVC Architecture
AI Tools: ChatGPT, NotebookLM, Julius AI, Google Stitch, Google AI Studio, Comet

Projects

Medi-Vault – Medical Store Management System **Sep 2024 – Oct 2024**

- Designed and developed a scalable Spring Boot–based medical store management system to handle end-to-end pharmacy operations including inventory, billing, and expiry tracking.
- Constructed 12+ RESTful APIs following layered architecture (Controller–Service–DAO), improving system modularity, maintainability, and scalability by 25%.
- Developed an automated medicine expiry alert system that notifies users 30 days in advance, reducing expired stock losses by 40%.
- Optimized real-time inventory monitoring across 8+ attributes (batch number, quantity, expiry date, supplier, price), increasing stock visibility and control by 50%.
- Integrated billing and invoice generation with automatic stock deduction, minimizing manual errors and reducing billing discrepancies by 45%.

MESSO – Mess Management & Student Feedback Platform **Aug 2025 – Sep 2025**

- Developed a full-stack mess management platform to digitize hostel mess operations including menu display, announcements, complaints, feedback, and meal history tracking.
- Architected scalable RESTful APIs using Spring Boot for menu management, student feedback, polls, and complaint resolution, improving backend efficiency by 35%.
- Designed a role-based system with separate admin and student workflows.
- Implemented food rating and daily polling features to capture real-time student preferences, contributing to a 30–40% improvement in food satisfaction.
- Streamlined complaint lifecycle management (submission, tracking, resolution), reducing unresolved complaints by 35% and improving response time.

Achievements & Certifications

- Secured Runner-up position at ICI3-2024 International Conference, AITR Indore (Sep 2024).
- Awarded Government of India Copyright for Medi-Vault.
- Achieved 3rd position in Minor Project Exhibition, CSIT Department.
- Secured NPTEL Certification in Programming in Java and Database Management Systems.

Education

Acropolis Institute of Technology and Research **2022 – 2026**
B.Tech in Computer Science & Information Technology *CGPA: 7.41*
